Torch UV System

The Torch UV Disinfection System provides high output UV-C for the quick disinfection of rooms. The Torch puts out 12 mJ/s at a distance of 10 ft, allowing it to treat large spaces easily within minutes. Its long bulb length allows it to maximize the surfaces contacted and treated by the UV light, further extending its effectiveness.

The Torch is used and trusted by some of the top hospitals in the country, and is extremely easy to use.

Flashbox

The Flashbox provides quick disinfection of handheld items such as cell phones, tablets, and remote controls in under a minute. The Flashbox comes in a variety of sizes, with custom sizes possible.

Lantern UV System

The Lantern UV Disinfection System provides high output UV-C for the quick disinfection of emergency vehicles and small rooms. The Lantern puts out 9 mJ/s at a distance of 4 ft, allowing it to treat small spaces easily. Its portability makes it easy to use for various applications, and its ability to be used in the upright or hanging positions further extend its usability.

The Lantern is used and trusted by many EMS companies, hospitals, and Doctor's offices to provide additional enhanced disinfection and is extremely easy to use.
